Little Rock, Arkansas | 469-682-1710 | chrismuzzin1020@gmail.com | chrismuzzin.info

Education

B.S in Computer Science | College of Engineering – University of Arkansas

Work Experience

January 2016 – Present

Front End Developer | Dillard's Inc. | Little Rock, Arkansas

- Embedded in multiple agile teams working closely with developers, business analysts, and QA's to build consistent, usable, and logical interfaces for users.
- Created initial wireframes, provided updated high fidelity mock ups as the project progresses, and built out applications using HTML, SCSS, and JavaScript.
- Involved with refactoring legacy applications into new front-end technology and oversaw google tag manager / analytics to track and improve efficiency for users.
- Mentored over the front-end portions for the new hire trainee projects.

June 2013 – August 2013

Administrative Assistant | Aramark | Dallas, Texas

Gathered data, developed spreadsheets, and formulated weekly reports regarding quality assurance for the daily food service operations within Baylor University Medical Center Nutrition Services. Assisted managers with employee schedules and completed evaluations of food service employee's activities.

Personal Projects

August 2017 – Present

Professional Website

Design, code, and maintain my own website to practice modern web practices.

August 2017 – Present

My-Spotify

A web application that utilizes Spotify's API and demonstrates a lot of functionality found on the Spotify web player.
